## Oben history

Since 1923 Oben's family founders have been passionate about creating the perfect bathroom a place where water and wonderful ideas flow together in endless expressions of innovation, indulgence and design.

For over 95 years this proud family-owned business has dedicated itself to being first with the future and second-to-none with everything else!

It's an attitude that has made Oben an undisputed market leader and earned it an envied international reputation as a modern day pioneer of bathroom and showering technology.

Oben's innovative shower products are built with the same solidity, durability and quality as their reputation so that you may enjoy the pleasure of their performance and beauty of their designs for many years to come.

Where space is  
a luxury

Oben's practical, space saving Neo Angle corner shower not only maximises space, it also makes the most out of what you can do in a space devoted entirely to indulgence, relaxation and wellbeing. Neo Angle is made from 10mm frameless toughened safety glass and comes with a single door in left or right hand options.

Shower finish illustrated in Matt Black. LH Drain

# Black-Line® – Lattice

Industrial, Stylish and Metropolitan

Make an impact in your bathroom with Oben Black-Line® Lattice Collection. Designed to stand out as a bold centerpiece, the Lattice collection draws inspiration from the industrial age, bringing an industrial chic to your bathroom.

Shower finish illustrated in Matt Black. LH Drain

## Black-Line® Lattice

This sleek new addition **Oben Black-Line®** collection is made from slimline anodised matt black aluminium frames. The black lattice effect is digitally printed on to the glass with ceramic ink and becomes permanently fused into the glass surface when toughened; making the glass much easier to clean and maintain due to the smooth inside glass finish.

### LATTICE – WALK-IN (FLAT PANEL)

Custom sizes and glass configurations available on request. Contact Oben Customer Service 09 44 33 879 for further details

# Shower niches

When remodelling a bathroom, consider adding a recessed shower niche into your design. It's a practical and streamlined way to add storage space for shampoos, soaps and accessories within your shower wall cavity, without taking away valuable elbow room.

Oben built-in recessed shower niches are a great alternative to chunky glass corner shelves and shower caddies. Available in a wide range of shapes and sizes to suit every installation.

MITRED EDGE

TILE TRIM

## EXTERNAL EDGE FINISHES

A mitred tile edge will give your niche that professional stylish designer look. Ask your tiler to quote mitred edges, which is where the tiles are cut on a 45-degree angle so that the tile edges meet therefore eliminating the necessity for tile trims. Alternatively aluminium tile trim extrusions are available in a range of finishes.

## FOOT REST

Oben's recessed Foot Rest offers a practical solution to shave your legs easily and safely in the shower.

## LIGHT BOX® NICHE 600 X 300

Adding a wall niche is a very practical and elegant way to create more storage space in your bathroom. Recessed wall niches enhance your bathroom design and provide a place to conveniently stow all your shampoos, shower gels and other shower items. Available in a range of sizes to match any bathroom style.

## LIGHT BOX® NICHE 300 X 300

Accessories as shown not included

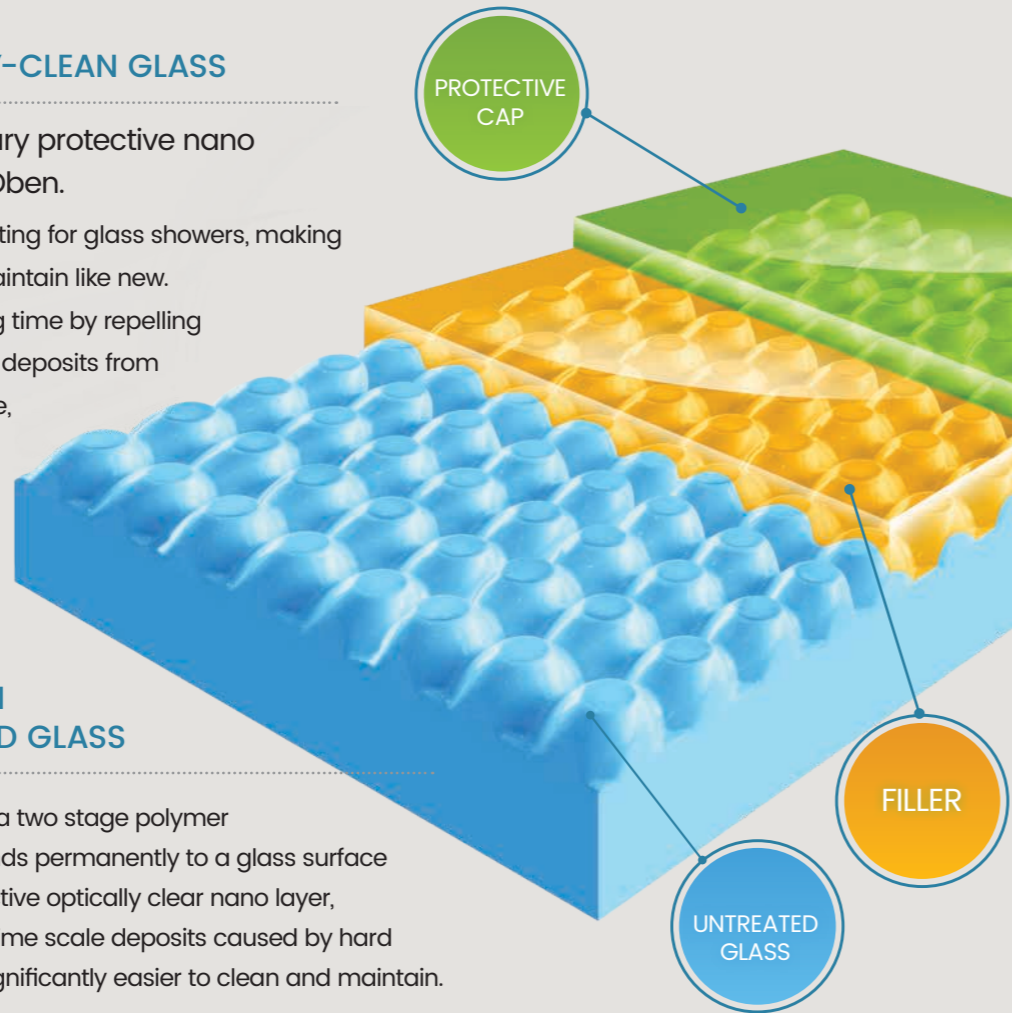

# What is Glide Glass®

## THE NON-STICK EASY-CLEAN GLASS

Glide Glass® is proprietary protective nano coating developed by Oben.

A long lasting protective coating for glass showers, making glass easier to clean and maintain like new.

Glide Glass reduces cleaning time by repelling lime scale and soap residue deposits from adhering to the glass surface, which results in significantly reduced time and effort for cleaning.

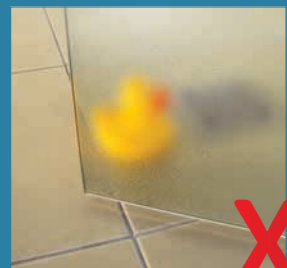

## WHAT IS THE DIFFERENCE BETWEEN TREATED & UNTREATED GLASS

Glide Glass® treated glass is a two stage polymer chemical reaction which bonds permanently to a glass surface providing an ultra thin protective optically clear nano layer, resistant to soap scum and lime scale deposits caused by hard water, making the surface significantly easier to clean and maintain.

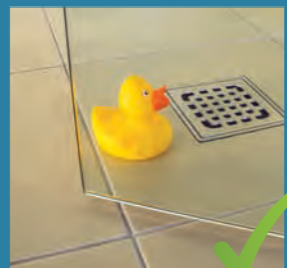

## Makes glass easier to clean and maintain like new.

- Highly water repellent (Hydrophobic)
- Resistant to Hard water
- Less frequent cleaning
- Reduces mould & bacteria build up

UNTREATED GLASS

TREATED GLASS

## Glide Glass®

Keeps your frameless glass shower looking like new!

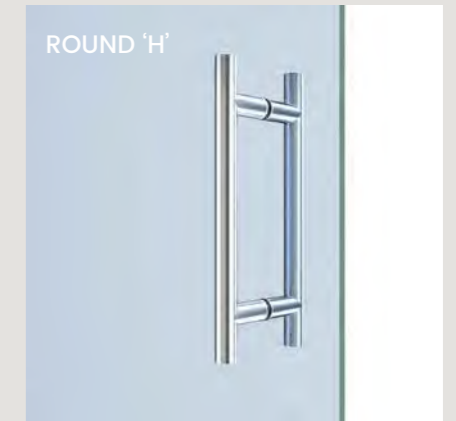

NON-STICK, EASY-CLEAN GLASS

**Glide Glass®** - Optional Extra, only available for **NEW** glass installations and must be specified at time of frameless glass shower order.

Average price for **Glide Glass®** Nano application per shower approximately \$150 - \$350 depending on shower size, includes Consumer Care & Maintenance Kit.

ORDER STEPS

- STEP 1 - Call / Email
- STEP 2 - Quote
- STEP 3 - Design
- STEP 4 - Deliver

1 Mark outline of base on timber floor.

2 Cut out 20mm flooring and remove.

3 Rebate joists to required depth to suit base model  
Fix additional joists to support ply infill ([www.oben.co.nz](http://www.oben.co.nz))

4 Install 20mm marine ply or compressed sheet.  
Glue and screw into position.

5 Glue PVC Flange to drain. Install tile & slate, ensuring 6mm clearance around LM flange. Install Gib/Villa board walls to bottom of rebate

6a **Tile & Slate Floor** - Apply polyurethane adhesive.  
2hr cure time (adhesive kit included).

6b **Concrete Floor** - Mix tile adhesive and apply with trowel into rebated base area. 8 hour cure time (adhesive kit included).

7 **Install Elusion® base** and weigh down with adhesive pail filled with water.

8 Apply butyl tapes and waterproof floors and walls.  
**Excludes waterproofing** - supplied by others

1 Install Oben LM 80 Flange, ensuring edge is butted up to bottom plate **A** dimension refer Technical Pages

2 Lay 6mm Tile Backer board over floor, cut out rebate around LM 80 flange. Floor must be level

3 Install Gib/Villa Board walls ensuring wall board is installed to floor substrate. Dry fit base and mark outline on floor

4a **Tile and Slate Floor** - Apply polyurethane adhesive. 2 hour cure time (Adhesive Kit included)

OR

4b **Concrete Floor** - Mix tile adhesive kit and apply with trowel to outlined base area. 8 hour cure time (Adhesive Kit included)

6 Apply butyl tapes, waterproof floor and walls as shown. Excludes waterproofing supplied by others.

7 Tile walls and base. Grout and silicone seal all corner joints. **IMPORTANT** (Refer to Elusion channel drain Width & Length specifications)

5 Install Elusion base and weigh down with adhesive pale filled with water or box of ceramic tiles

8 Fit Oben Elusion channel drain, tile insert inner pan and silicone into position.

Ultra Low Threshold

Tile Trim Edge

Mitred Edge

A tile that has been "rectified" has had all edges mechanically ground to achieve a smooth face. This process involves cutting and grinding the tile to a precise size.

Rectangle	1500 X 300	1600	400	95	1595	395

\*Also available in 75mm stud depth on request

## SHOWER MIXER POSITION?

With today's Walk-In showers becoming larger and more popular than ever it is important that the mixer position be considered so the bather can adjust temperature during showering.

After the first minute of showering the body's skin receptors become acclimatised to the original temperature set and requires an incremental increase of 1°C every minute over a two-minute period to eliminate any body cooling effect.

The shower mixer be should be positioned where the bather can easily reach the mixer to adjust water temperature during showering.

## SHOWER MIXER & NICHE HEIGHT?

If specifying a recessed shower niche, then you will need to ensure your plumber installs the shower mixer to the recommended height of 1000 mm off the sub floor allowing sufficient clearance between mixer elbow and niche nog support.

## SHOWER NICHE HEIGHT CALCULATION - Elusion Threshold Base only

Oben recommends internal niche shelf height is set at 1200 mm off sub floor. This allows for a 20 mm safety buffer which can be used to raise the niche shelf tile height junction to match the finished wall tile height.

Ask your builder to consult with your tiler regarding your actual shower recess height required as this may vary depending on actual tile size selection, grout joints and tiled floor levels.

Tiles are a nominal size and can vary from actual size advertised. Example 600 X 600 tile may be only 595 X 595.

**\*IMPORTANT.** Above niche height recommendations are not suitable for Elusion Level Entry Bases as rebate depth varies between models effecting tile datum. Please refer to Oben website (Elusion Level Entry Rough-In Guide PDF)

**IMPORTANT.** Tile layout dimensions and drawings provided are to be used as a "GUIDE ONLY" and actual niche height must be specified by a tiler in conjunction with your builder in order to determine the niche height required to suit your wall tile selection.
