Oben History

Since 1923 Oben's family founders have been passionate about creating the perfect bathroom a place where water and wonderful ideas flow together in endless expressions of innovation, indulgence and design.

For over 95 years this proud family-owned business has dedicated itself to being first with the future and second-to-none with everything else!

It's an attitude that has made it an undisputed market leader and earned it an envied international reputation as a modern day pioneer of bathroom and showering technology.

Oben's innovative shower products are built with the same solidity, durability and quality as their reputation so that you may enjoy the pleasure of their performance and beauty of their designs for many years to come.

New build or renovating

It's never
been easier
to create
a Level Entry Shower

with Oben wafer®

Oben makes it easy

Tiler

"Oben makes it easy for me to create an exquisite tile shower, every time"

Oben technology - everything a tiler could wish for

- **100% Waterproof** shower base system
- Pre-formed slopes **guarantee drainage**
- **Rock-Solid** - no chance of movement
- Compatible with **any** waterproofing system
- Easy and fast to tile - **no crowning**

"With Oben behind us, we say "yes" to every shower request"

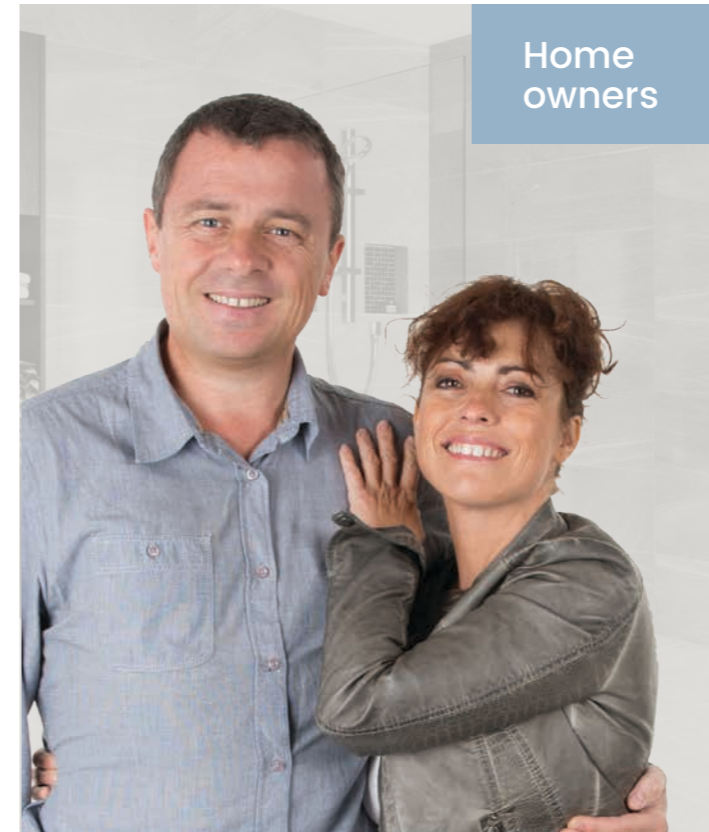

Quality and Service you can rely on

Builder

- **Established brand** since 1923
- High quality products you can **trust & depend** on
- Design solutions for **every shape** of shower
- **On time deliveries** - each time - every time!
- Hassle-free factory **installation service**

Home owners

"The whole experience of designing one of the most important areas in our home has been a breeze with Oben"

- Oben brochures **makes it easy!**
- **"Peace of Mind"** - 25 year Leak Proof Guarantee
- Full range of tile showers - **Any Shape, Any Size**
- **Total package** - Drains, Base and Frameless Glass
- **Level Entry** design

"Oben, their precision in design and their history in the market says it all!"

Architect

- Oben brand - totally **dependable** and trustworthy
- Tiled shower solutions for **new** and **renovations**
- Oben offers the ultimate in **versatility** and luxury
- Sleek minimalist designs - **Function with style**
- Oben enables us to **design** any custom shower

Indulge

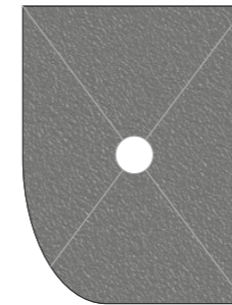

Curves create space
so Oben created
curves

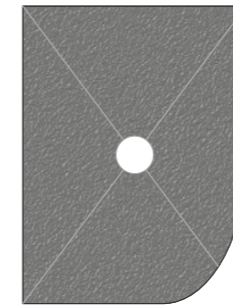

With Oben you never know what's "round" the corner!
What you do know is that it's bound to be big on luxury like this
unique, Walk-In shower made from a single sheet of curved
toughened safety glass. The 'J' Walk-In Level Entry is a special
feature in any bathroom.

imagine

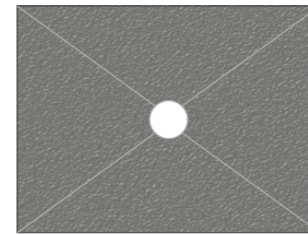

The ultimate
in versatility and
luxury

Step into luxury with the new range of Oben Walk-in free standing glass panels which do not require an overhead stabilising bar. The simplicity of a single sheet of toughened glass panel creates a luxurious Walk-In shower in any bathroom, the ease of walking into your shower with no doors to negotiate needs little explanation.

Luxuriate

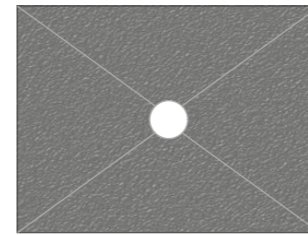

Let yourself be inspired

The latest in minimalistic 10mm glass makes the slide shower an impressive design statement. Extra smooth stainless steel roller technology provides for smooth and effortless door opening and closing action. Minimalistic in appearance, this modern frameless sliding glass enclosure provides that truly "Frameless look" and is the flagship of the Oben shower range.

Enjoy

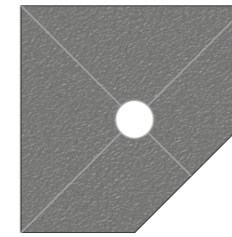

Where space is a luxury

Oben's practical, space saving Neo Angle corner shower not only maximises space, it also makes the most out of what you can do in a space devoted entirely to indulgence, relaxation and wellbeing. Neo Angle is made from 10mm toughened safety glass and comes with a single door in left or right hand options.

Shower niches

When remodelling a bathroom, consider adding a recessed shower niche into your design. It's a practical and streamlined way to add storage space for shampoos, soaps and accessories within your shower wall cavity, without taking away valuable elbow room.

Oben built-in recessed shower niches are a great alternative to chunky glass corner shelves and shower caddies. Available in a wide range of shapes and sizes to suit every installation.

MITRED EDGE

TILE TRIM

EXTERNAL EDGE FINISHES

A mitred tile edge will give your niche that professional stylish designer look. Ask your tiler to quote mitred edges, which is where the tiles are cut on a 45-degree angle so that the tile edges meet therefore eliminating the necessity for tile trims. Alternatively aluminium tile trim extrusions are available in a range of finishes.

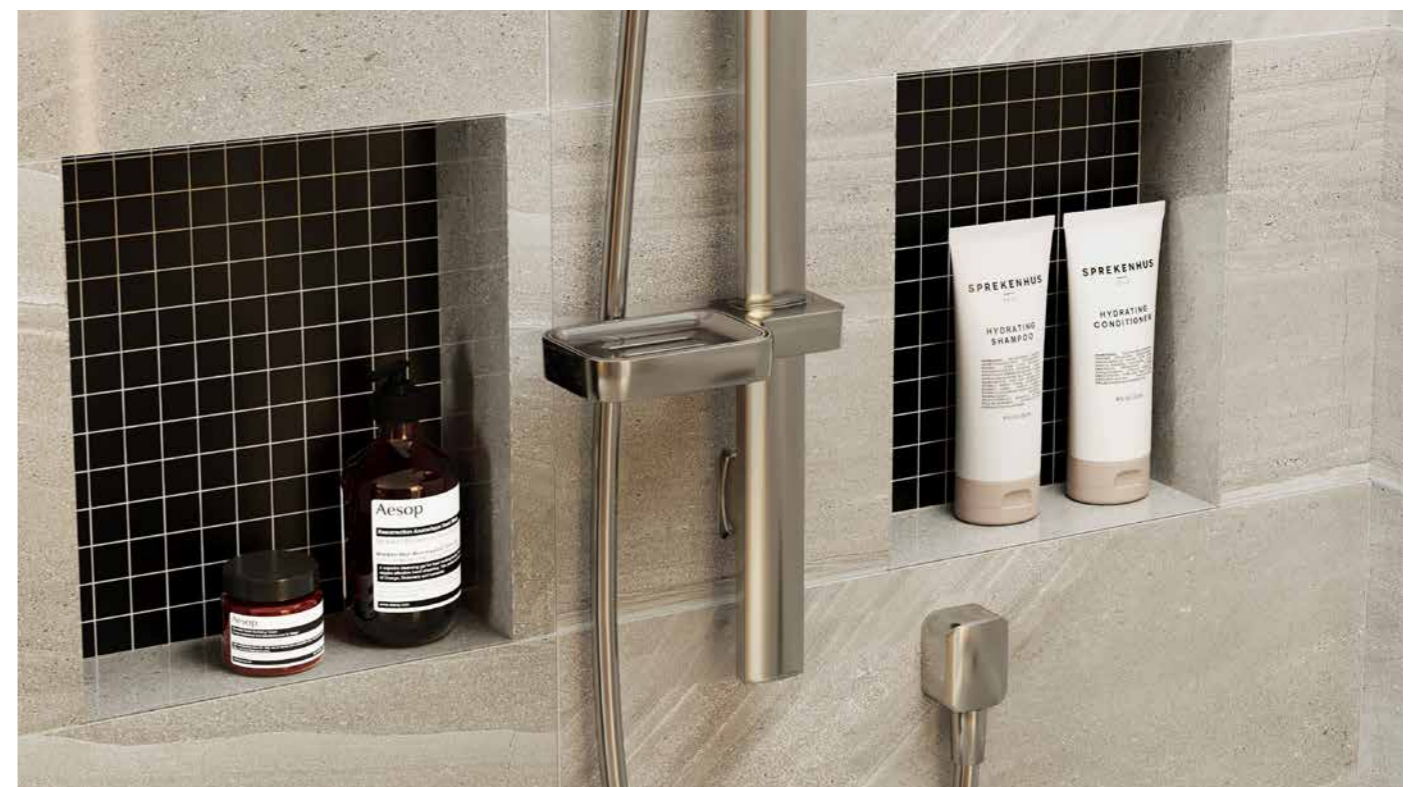

FOOT REST

Oben's recessed Foot Rest offers a practical solution to shave your legs easily and safely in the shower.

NICHE 600 X 300

Adding a wall niche is a very practical and elegant way to create more storage space in your bathroom. Recessed wall niches enhance your bathroom design and provide a place to conveniently stow all your shampoos, shower gels and other shower items. Available in a range of sizes to match any bathroom style.

NICHE 300 X 300 His 'n' Hers®

Accessories as shown not included

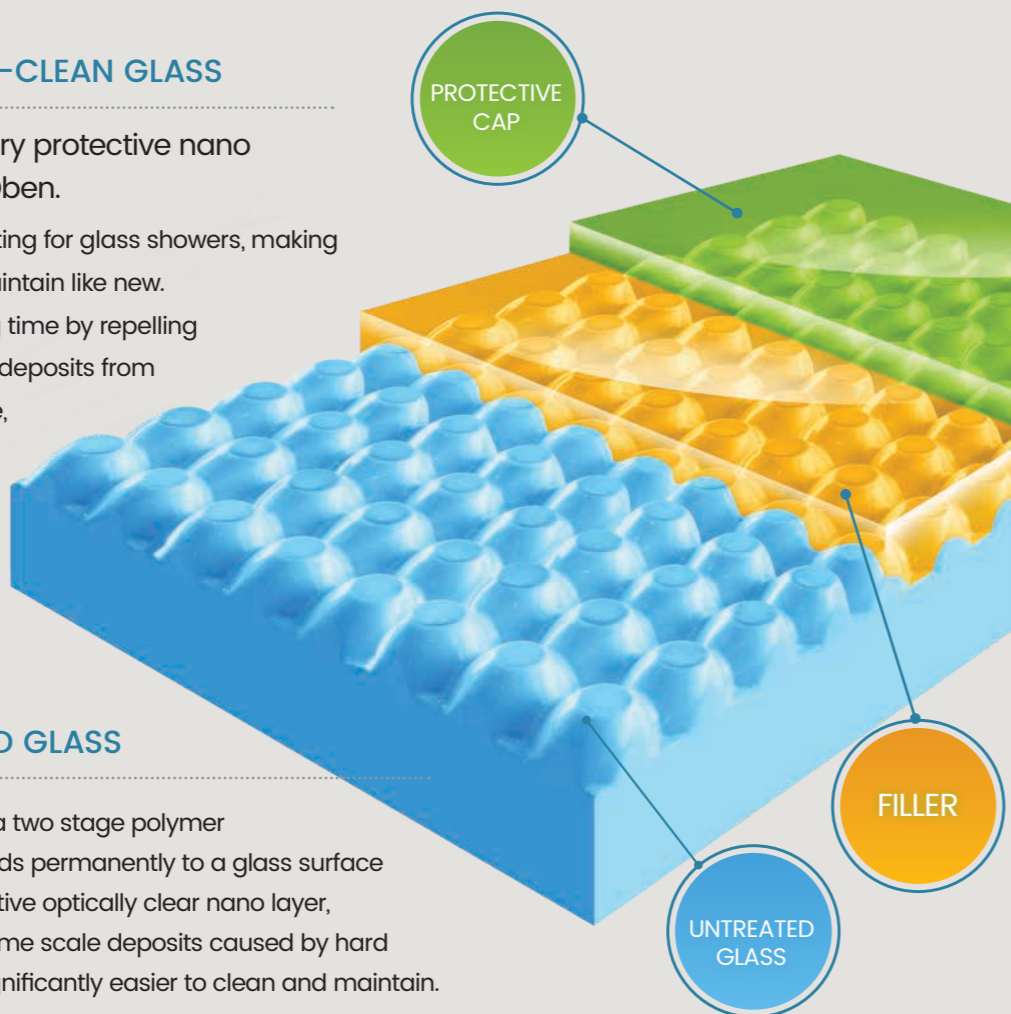

What is Glide Glass®

THE NON-STICK EASY-CLEAN GLASS

Glide Glass® is proprietary protective nano coating developed by Oben.

A long lasting protective coating for glass showers, making glass easier to clean and maintain like new.

Glide Glass reduces cleaning time by repelling lime scale and soap residue deposits from adhering to the glass surface, which results in significantly reduced time and effort for cleaning.

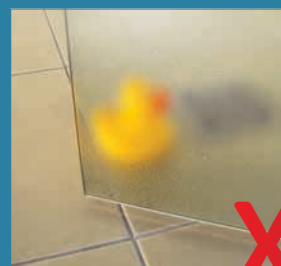

WHAT IS THE DIFFERENCE BETWEEN TREATED & UNTREATED GLASS

Glide Glass® treated glass is a two stage polymer chemical reaction which bonds permanently to a glass surface providing an ultra thin protective optically clear nano layer, resistant to soap scum and lime scale deposits caused by hard water, making the surface significantly easier to clean and maintain.

Makes glass easier to clean and maintain like new.

- Highly water repellent (Hydrophobic)
- Resistant to Hard water
- Less frequent cleaning
- Reduces mould & bacteria build up

UNTREATED GLASS

TREATED GLASS

Glide Glass®

Keeps your frameless glass shower looking like new!

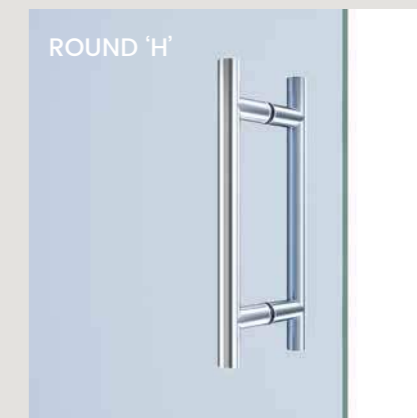

NON-STICK, EASY-CLEAN GLASS

Glide Glass® - Optional Extra, only available for **NEW** glass installations and must be specified at time of frameless glass shower order.

Average price for **Glide Glass®** Nano application per shower approximately \$150 - \$350 depending on shower size, includes Consumer Care & Maintenance Kit.

Suitable for all tile sizes

Easily cut

Superior thermal insulating qualities

Superior sound insulating qualities

Dimensionally stable

wafer[®] Base Installation

Specifically designed

for timber floors.

Oben makes it Easy!

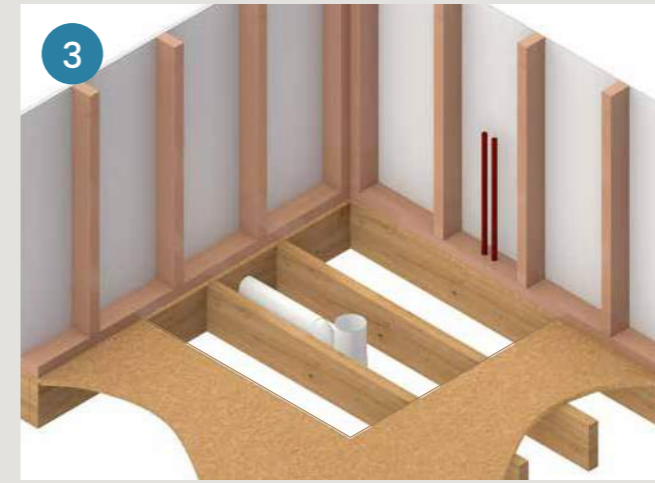

A revolution in Level Entry Base Design

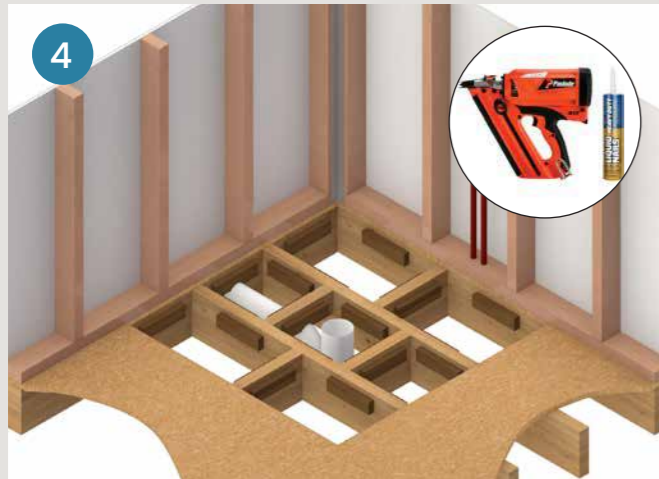

1 Mark outline of base on timber floor.

2 Cut out 20mm flooring and remove.

3 Install plumbing (drain riser, hot and cold water pipes).

4 Fix nogs or extra joists where required, to provide support to all edges of the ply infill.

5 Infill between joists with marine ply or compressed sheet. Glue & screw into position.

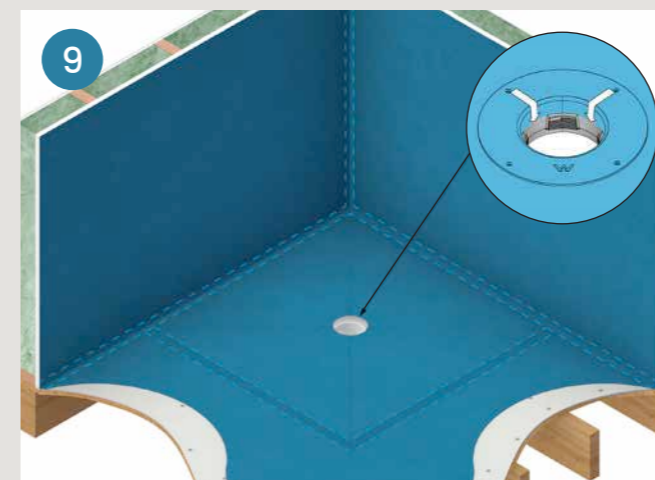

6 Install Gib/Villa board walls ensuring it follows rebate in base profile.

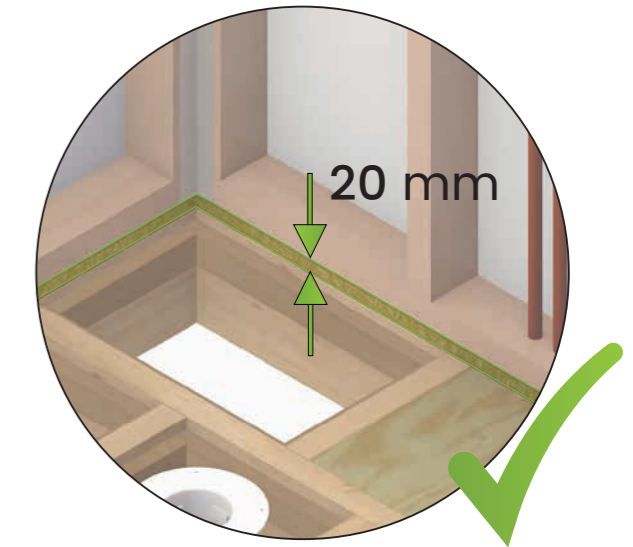

7 Fix Tile & Slate to floor outside shower pan area. Apply Polyurethane adhesive - 2 hour cure time. (Adhesive Kit included)

8 Fit wafer[®] base and weight down with adhesive pail filled with water.

9 Apply butyl tapes and waterproof floor and walls. Excludes waterproofing - supplied by others.

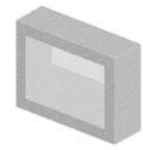

- Ultra Low 24mm Profile
- No Joist Rebate required
- Quick and Easy Installation
- Fast 2 hour Adhesive Cure

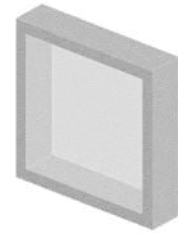

Traditional Level Entry Installation

- Expensive
- Additional Labour and Materials
- Requires Joists to be Rebated

1 Rough-In timber framing to support niche - Ref (Niche Rough-In Guide)

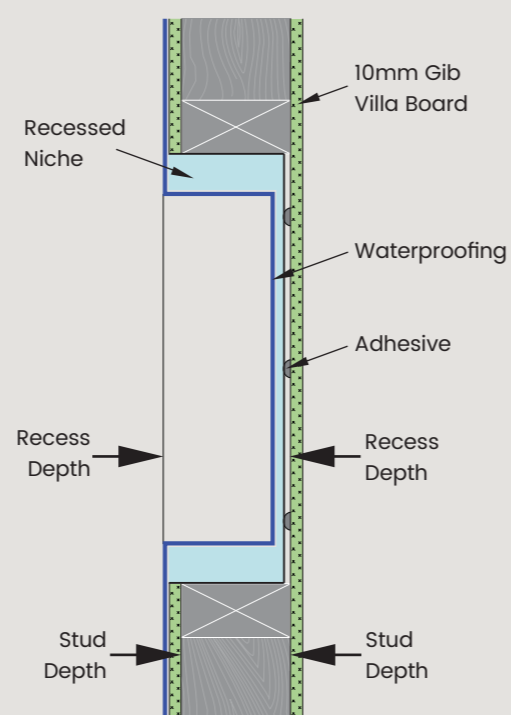

2 Fix Gib / Villa Board, dry fit niche, remove and apply adhesive.

3 Install niche, ensuring front face is flush with front face of Gib/Villa Board.

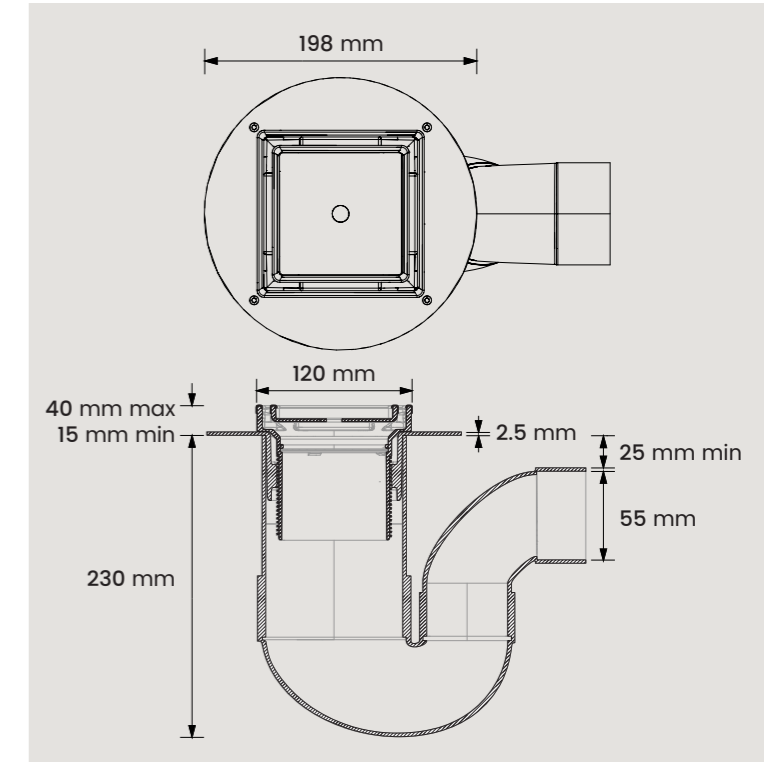

4 Apply Butyl Tapes and waterproof wall and niche.

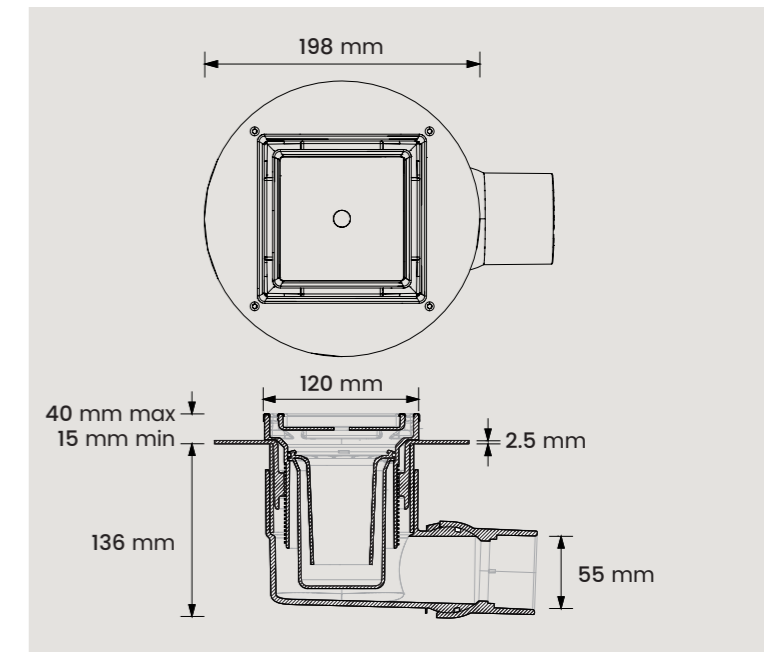

Oben Tile Drains

J GULLY HI FLOW TILE DRAIN
100 x 50

EASY CLEAN TILE DRAIN
100 x 50

AN INVISIBLE DRAIN SOLUTION

Oben's NEW tile insert drain eliminates the need for a traditional grate in your shower.

The tile insert drain cover allows you to create a seamless and almost invisible finish, allowing your shower floor tile choice to become the drain cover.

A small perimeter slot allows water to drain making the drain virtually invisible.

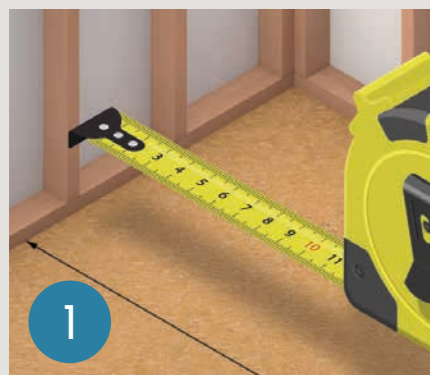

Base installation easy as 1 2 3

REBATE DEPTH

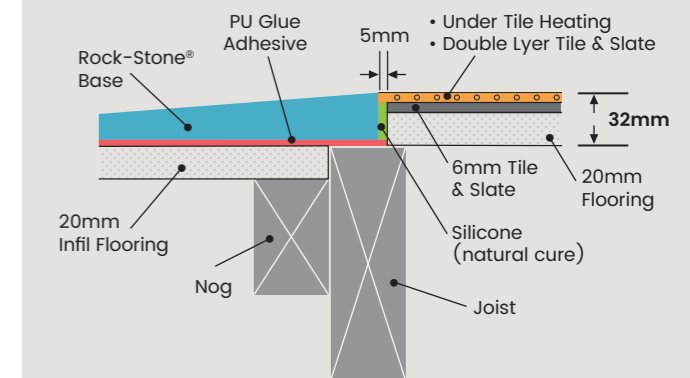

WALL DETAIL

TIMBER FLOOR DETAIL 800>1800mm

TIMBER FLOOR DETAIL 1800>2000*mm

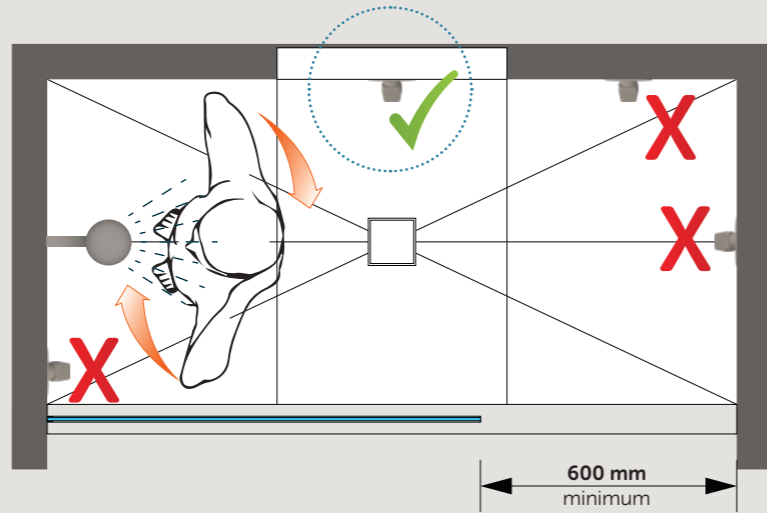

*IMPORTANT Wafer® Bases greater than 1800>2000 length (MAX) will require additional 6mm floor height.

SHOWER MIXER POSITION?

With today's Walk-In showers becoming larger and more popular than ever it is important that the mixer position be considered so the bather can adjust temperature during showering.

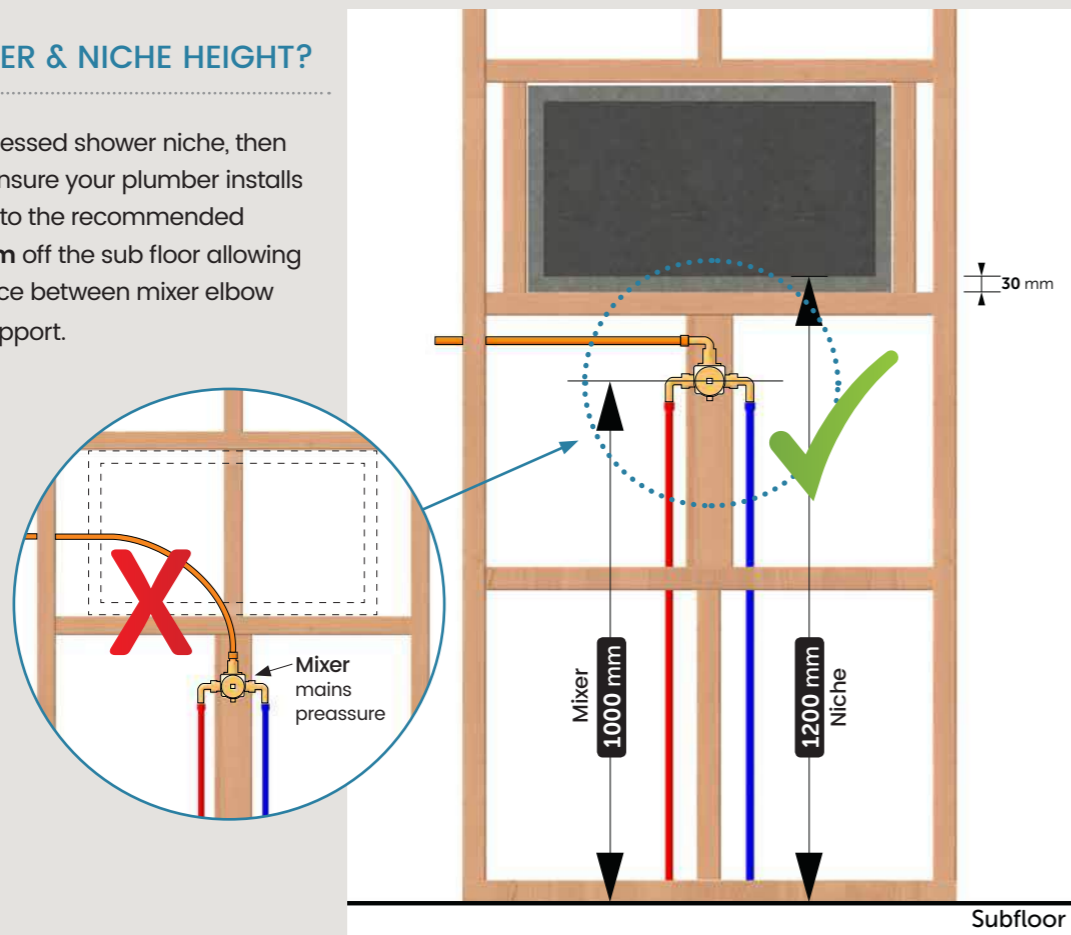

After the first minute of showering the body's skin receptors become acclimatised to the original temperature set and requires an incremental increase of 1°C every minute over a two-minute period to eliminate any body cooling effect.

The shower mixer be should be positioned where the bather can easily reach the mixer to adjust water temperature during showering.

SHOWER MIXER & NICHE HEIGHT?

If specifying a recessed shower niche, then you will need to ensure your plumber installs the shower mixer to the recommended height of **1000 mm** off the sub floor allowing sufficient clearance between mixer elbow and niche nog support.

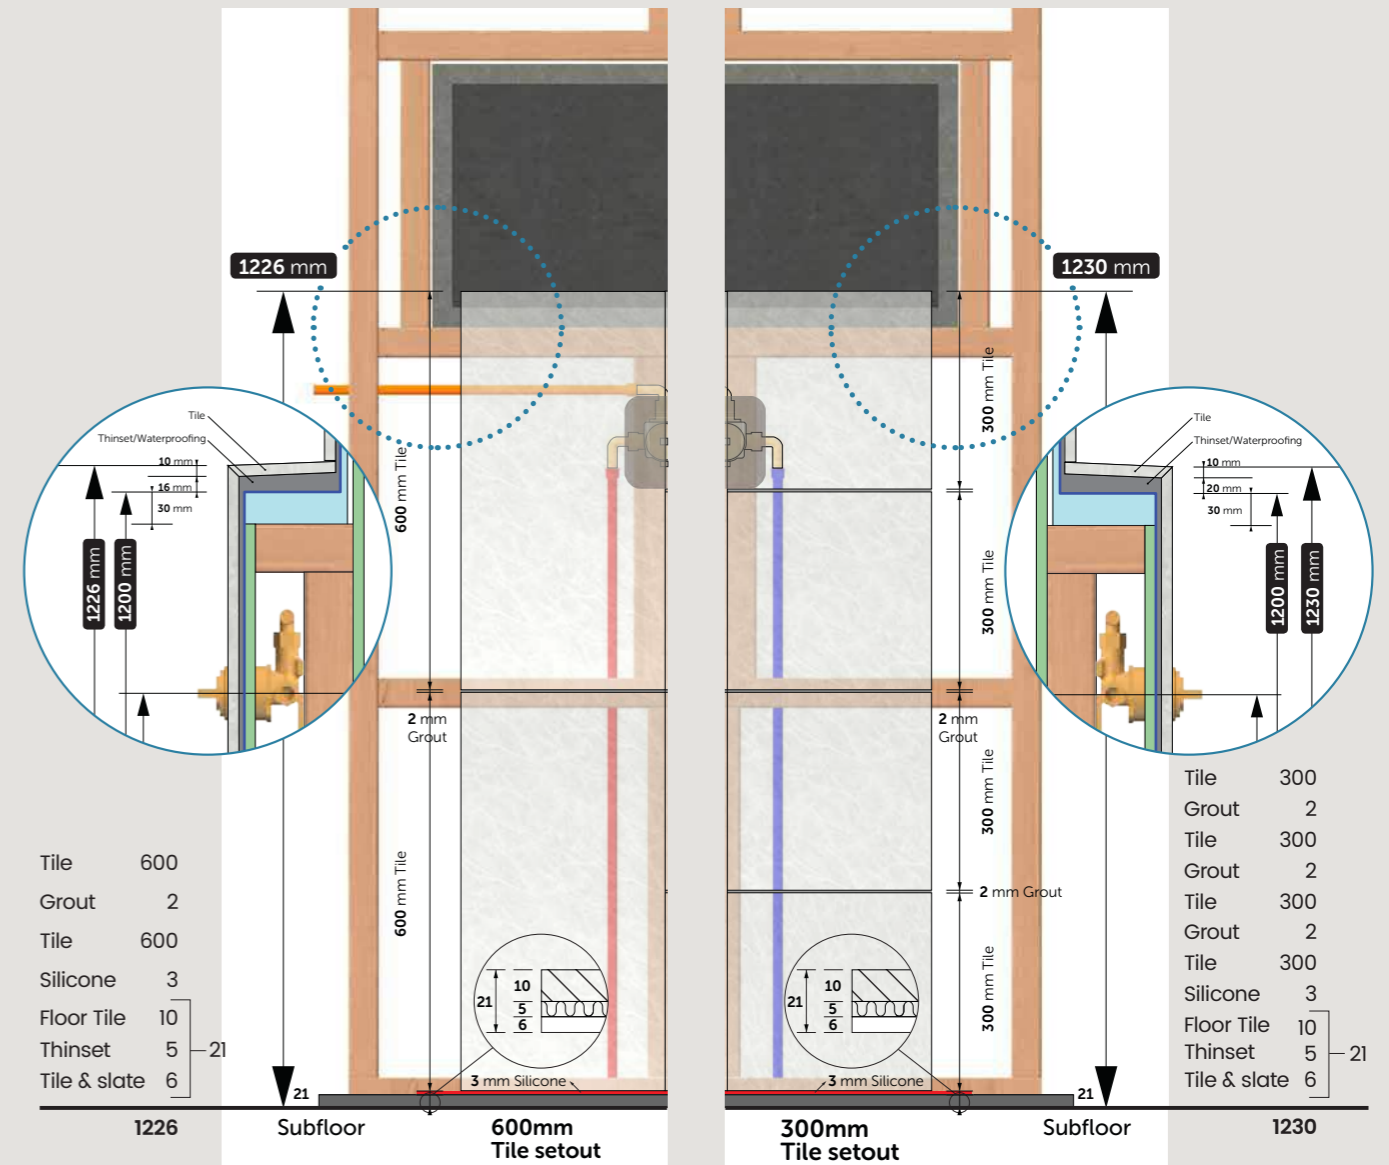

SHOWER NICHE HEIGHT CALCULATION - Wafer Base (Level Entry)

Oben recommends internal niche shelf height is set at **1200 mm off sub floor**. This allows for a 20 mm safety buffer which can be used to raise the niche shelf tile height junction to match the finished wall tile height.

Ask your builder to consult with your tiler regarding your actual shower recess height required as this may vary depending on actual tile size selection, grout joints and tiled floor levels.

Tiles are a nominal size and can vary from actual size advertised. Example 600 X 600 tile may be only 595 X 595.

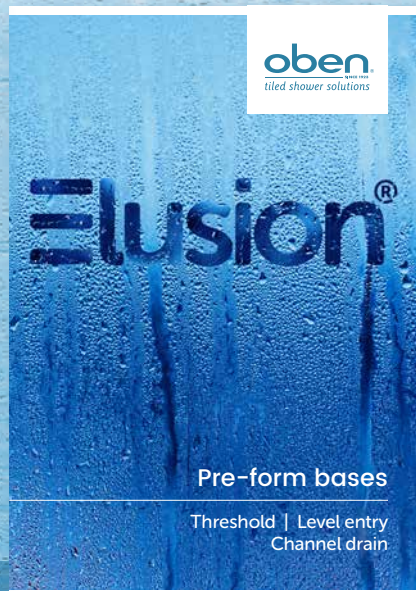

***IMPORTANT**
Above Niche height recommendations are **not suitable for Elusion** channel drain base models as Niche heights vary between models – Please refer to Elusion Brochure

IMPORTANT.

Tile layout dimensions and drawings provided are to be used as a "GUIDE ONLY" and actual niche height must be specified by a tiler in conjunction with your builder in order to determine the niche height required to suit your wall tile selection.
